DETAILED ACTION

1. This is in responsive to information disclosure statement filed on 20 November 2005.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 1 June 2004, and 20 November 2005 were filed before the mailing date of the first office action. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

3. Claims 1 – 20 are presented for the examination.

Claim Objections

4. Claims 15, and 17, are objected to because of the following informalities:
 5. In the claim 15, replace "the voltage" in line 3 on page 134 with ---a voltage--- as sensing voltage has not previously recited in the claim.
 6. In the claim 17, insert ---current flow--- following the words "said adjustably limiting" in line 2 on page 134 as current flow is missing element in said limitation.
- Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir.

Art Unit: 2116

1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1 – 20 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 – 40 of copending Application No. 10/750856 and claims 1 – 20 of copending Application No. 10/750877. Although the conflicting claims are not identical, they are not patentably distinct from each other because:

8. Independent claims 1, and 11 of current applications are almost similar to claims 1, 8, 21, and 28, of pending applications 10/750856, and claims 1, and 11 of pending application 10/750877 including plurality of power consuming and providing entities with first and second operative mode, a pooling controller, a controllable switch to enable flow thereto and therefrom, and controller to limit current flow.

9. Dependent claims 2 – 10, and 12 – 20 of current application are directly or indirectly similar to claims 2 – 20, and 2 – 10, of pending application 10/750856 and 12 – 20 pending application 10/750877.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
